Bureau of Authorization & Community Based Services

What is the ICF/ID Transition Program?

The purpose of this program is to give a limited number of people living in an Intermediate Care Facility for People with Intellectual Disabilities (ICF/ID) within Utah, the opportunity to transition into the Community Supports Waiver. This waiver program provides services and supports to people who live at home or in other community based settings. The day to day operation of the waiver is managed by the Division of Services for People with Disabilities. For more information you can visit:

<http://www.dspd.utah.gov>

Can I choose to stay where I am?

Yes. This program is completely voluntary.

Who is eligible for consideration in the program?

To be eligible for selection in the program you:

- Must live in a Utah ICF/ID for at least 12 months in a row
- Must be a Utah Medicaid recipient

Can all eligible individuals participate?

No. There is a limited amount of money for this program and only eligible individuals selected and contacted by Medicaid may participate.

How are people selected for the program?

Half of the people are selected based on how long they have lived in an ICF/ID and the other half are selected through a random process. This allows all eligible individuals an opportunity to be included in the program.

How can I learn more?

The best people to contact are:

- The Administrator of the ICF/ID where you live
- Any of the contacts listed on the left side of this fact sheet
